For further research assistance access the Wahlstrom Library website via the myUB Portal.

Ask a Librarian via Chat: Available when the Library is open through the Library website.

E-mail a Librarian: reference@bridgeport.edu

Call a Librarian: 203-576-4747

Walk-ins welcome, no appointment needed!
Google Scholar is a simple way to search broadly for scholarly literature. Features of Google Scholar include:

- Search all scholarly literature in one place, including articles, theses, books, abstracts, and court opinions.
- Explore related works, citations, authors, and publications.
- Keep up with recent developments in a search area using Alerts.
- Check who is citing specific publications.

**How to Find It**

- If you are logged into a Google account, Google Scholar can be accessed via the icon in the top-right.
- The website is: http://scholar.google.com

**CAUTION**

Google Scholar yields many different types of sources in search results. Be sure what you’re using meets assignment requirements.

Every source in Google Scholar is **not** peer reviewed. For peer reviewed sources use a library database. Many library databases can filter for **only** peer reviewed journal articles.

**Full Text Access**

Abstracts are available for most articles, though full text access may require a subscription. A few things to try...

- Click a “Check UB for Full Text” link to the right of the search result.
- Click a link labeled [PDF] to the right of the search result.
- Click “All versions” under the search results to check for accessible alternative sources.
- Click “Related articles” or “Cited by” to explore similar articles.

**Finding Recent Sources**

Search results are by default sorted by relevance, not date. To find newer articles try the following:

- Click “Since Year” to show only recently published papers sorted by relevance.
- Click “Sort by date” to show new additions sorted by date.
- Click the envelope icon to have new results periodically delivered by e-mail.

Need help? Ask a librarian! We use Google Scholar all the time and can help you get better results and the answers you need.
