For further research assistance access the Wahlstrom Library website via the myUB Portal.

**Ask a Librarian via Chat:** Available when the Library is open through the Library website.

**E-mail a Librarian:** reference@bridgeport.edu

**Call a Librarian:** 203-576-4747

**Walk-ins welcome!**
Google Scholar lets you limit your Google search to scholarly, academic articles. If you are going to search online for information to complete academic assignments, using Google Scholar will help you find more relevant, better quality sources.

Find Google Scholar via the in the top-right, then click More at the bottom of the window that appears. Choose even more, then find Google Scholar in the specialized search section.

You could also search for Google Scholar in Google, in which case it will be the first search result.

By default, search results are listed by relevance. To find articles by date, in the left-hand sidebar:

1. Click Since Year to show only recently published papers, sorted by relevance.
2. Click Sort by date to show only the new additions, sorted by date.
3. Click the envelope icon to have new results delivered by email.

When available, links to full-text will appear to the right of each search result & citation:

If you find an article via Google Scholar and want to see if you can access it through the library, check if we have access to the journal listed in the article’s citation through the eJournal Finder found on the library homepage accessed through your myUB Portal.

If we do not have access to the journal the article comes from, fill out the InterLibrary Loan form which can be access on the library homepage.

CAUTION

Be aware that Google Scholar brings many different types of sources into search results. Books, journal articles, websites, government reports, and more. If you need specific sources, be sure what you’re using meets assignment requirements.

Also, every article in Google Scholar is not peer reviewed. If that is required, you may want to use a library database, which can be told to only show you peer reviewed articles. It makes your life easier!
